

Pump the Brakes

Refused

genocide on genocide - destroyed knowledge crushed pride
lost culture to civilization - reduced abused beyond dignity
contemplation exploitation - ring the bell of information
blocked the truth convincing, controlling - held us down unthink-
ing, unknowing
oppressed so many for so long - we've ignored the facts, and moved
along
we gotta pump the brakes
wasting resources, face some facts and detect the causes - cause
our progression equals
destruction, people getting killed by government corruption
cause making most of the land, that's the plan, you gotta under-
stand
that 50 years down the line, there won't be no time, the time is
now.
drained so much for so long - we've ignored the costs and moved
along
time to pump the brakes
gotta pump the brakes, pump pump the brakes...
