

# Hollow

Remy Zero

It felt like the sun  
We are hollow  
Light to the world  
Film star

Define all the ways  
We are hollow  
I am ghost  
You are song

So you walk  
Way from me  
Were you  
Ever there?

You were  
Too quick  
Or cold to believe  
Unbelievable

You can never fail  
We can never fail  
We can only go down south  
In flames a place you forgot about

Oh, we are hollow  
Light to the world  
Film star

Define all the ways  
We are hollow  
I am ghost  
You are song

Lights that freeze  
Turn perfect scenes  
Into sorrow

Don't slip away  
With all the words  
You had to say

You never had a prayer  
You can never fail  
We can never lose  
We can only come down  
Sink to your knees  
Let the others fire, sound

When I fell out in the traffic  
All their voices comin' at me  
Comin' on in the street  
She was every kind of creature  
Every twisted up invention of a human face

We're going in for one more kill  
And the sound of their machinery

Devoured so many languages  
And all of them said

You'd be so ecstatic  
To finally be with it  
But fools will win the race  
So dive back down to your bed

All your strength  
Is about to be found  
Crawling up  
Out of the ground

Now play what you wanted to play  
You say what you wanted to say  
You finally found a way  
All of the stars coming down

How did it feel  
When you  
Hit the ground

It felt like the sun  
We are hollow  
Light to the world  
Film star

Define all the ways  
We are hollow  
I was the ghost  
You were song

It felt like the sun  
It felt like the sun  
It felt like the sun  
I was the ghost  
You were song

It felt like the sun  
It felt like the sun
