## **Nobody**

## **Robert Randolph & The Family Band**

As I'm looking out my window I could see my time with you is running low When I think about All that you've done The truth hits me like the morning sun Can't nobody-Can't nobody love me like you love me You've never left me on my own You are the reason I sing this song You've kept me warm on the coldest nights You helped me get from the dark to the light I'm ready to die While I know that you love me
