Rock Is Our Life

We stand here together Fearless and proud Raise up your voices Let the music be loud There's nothing between us We stand here as one The waiting is over, your time has come

Raise up your hands into the light We stand together 'cause rock is our life Lift up your voices into the night We stand together 'cause rock is our life

Rocking together Into the night Denim and leather The feeling is right Will you be standing When the music is done The waiting is over, you time has come

Raise up your hands into the light We stand together 'cause rock is our life Lift up your voices into the night We stand together 'cause rock is our life

Voices together This is your song Here is the spirit Where we all belong When we stand together The bands will play on
