Some Truth (Has Better Left Unknown)

[Sinner]

Remember times we're acting wild Our pulse was beating tight We have an aim, we could believe You exposed a brand new side You're only live to criticize I have to face reality

The innocence's gone Your roses ... faded for too long

[Chorus 1:] Some truth has better left unknown Some dreams will never die Two hearts will be facing the truth Beating to survive A secret to keep [2]

The single touch was like a spark And it opened up my heart... That there are some other ways I have to leave this twisted road... For reasons better left untold As the naked truth comes walking in

Well, my soul is caged Sweet devil behind a pretty face

[Chorus]

The single touch was like a spark And it opened up my heart... That there are some other ways

The innocence's gone Your roses ... faded for too long

[Chorus 2:] Some truth has better left unknown Some dreams will never die Two hearts will be facing the truth Beating to survive

[Chorus 2]

Some truth has better left unknown [2]
