

# Starlight

Sophie Ellis-Bextor

Hold a moment in time  
And look to the skies  
And we are frozen in light  
Not a second goes by

Is it a waking dream holding me?  
You never really know till you know  
In the blink of an eye  
Hearts will unite

We are one  
Find us under the starlight, starlight, starlight  
I could die, right here in your arms  
We are one  
Caught here under the starlight, starlight, starlight  
Oh! Cos tonight we found heaven in the dark

No silhouette in my mind  
It's just you and I  
And as the starlight shines  
Bodies are blind

It's so natural, unbreakable  
Won't ever let you go, let you go  
Hand in my hand  
Here till the end

We are one  
Find us under the starlight, starlight, starlight  
I could die, right here in your arms  
We are one  
Caught here under the starlight, starlight, starlight  
Oh! Cos tonight we found heaven in the dark

As the new day rises  
Lost in our embrace  
WE ARE ONE!

We are one  
Find us under the starlight, starlight, starlight  
I could die, right here in your arms  
We are one  
Caught here under the starlight, starlight, starlight  
Oh! Cuz tonight we found heaven in the dark
