## **When I Dream**

Seems the road goes on and on And it never ends And in my heart where I belong Is there with you You know I'd be right by you side If I only could But on a train called fate I ride, oh oh

Now it seems like you're A million miles away Soon I'll be comin' home to you Girl, I wanna but there's One more song to play So for now I'm gonna close my eyes Pretend you're here with me And I'll be with you When I dream

Sometimes I wonder late at night When I'm all alone If I could live another life, oh How could I leave this all behind When it's a part of me That without, I surely would die Tell me why

Now it seems like you're A million miles away Soon I'll be comin' home to you Girl, I wanna but there's One more song to play So for now I'm gonna close my eyes Pretend you're here with me And I'll be with you When I dream
