

California, I Love That Name

Stars

California is the place to be
When you're alone in the world and you wanna be free
Up in the hills or down by the sea
Deep in the canyons where the vampires run free

California, dry as the moon
We wanna watch the end and we'll be there soon
Sun is the color of blood in my mouth
We were dying in the north so we all ran south for the good life

California, I love that name
Free from the past and free from the pain
California, wish you were here
Where the blood runs cold and the skies are clear
It's the good life
It's the good life

California burns to the sky
We're here to take the picture and to call out why
California, I love you at night
When all the lonely killers have turned out the light
And it's still
And we got hours to kill

California, I love that name
Free from the past and free from the pain
California, wish you were here
Where the blood runs cold and the skies are clear

California, I love that name
Free from the past and free from the pain
California, forget what I mean
But the blood runs cold and the skies are clear
It's the good life
Yeah, it's the good life
It's the good life
Oh, it's the good life

Drive west on sunset to the sea
Drive west on sunset to the sea
Drive west on sunset to the sea
You'll never find me
