

## Forever

Tanita Tikaram

Thought I'd call you up  
To make you see what's true  
But nothing seems quite right  
It's like I'm lying back at you

If that's the way it goes  
To cut you like it does  
For nothing tastes more bitter  
Than the fever that you lost

Do you think that love can last forever  
Do you think that love can last forever

It's not like people leave  
They're really leaving you  
It's just a different world  
Just a different thing to do

Do you think that love can last forever  
Do you think that love can last forever

The more that you see her  
The more you fall apart

You thought you were of stronger stuff my friend  
A stronger heart my friend  
You'd see it to the end  
You're still searching in the dark

Do you think that love can last forever  
Do you think that love can last forever  
Do you think that love can last forever  
Forever for you...
