

It was early for a summer  
All the people and the noise from the bar  
You in your gray dress, your arm on the window  
You said, what's the difference, what's the difference?

Just say it to me  
Just say it to me  
And let's not make it a thing  
It will be OK, babe

And that was love, when we were sober  
And you're so nervous and all  
And the air is getting colder

OK everything, everything, it's everything  
Everything, everything, it's everything  
Everything, everything, it's everything  
Everything, everything, it's everything  
Everything, everything, it's everything  
Everything, everything, it's everything  
Everything, everything, it's everything  
Everything

Do you really want to hear that?  
Why is everyone staring?  
Were you happy?  
Were you honest?  
Did you ever believe that any of this was real?

We can't just slow down now  
It is not safe for driving out this town  
I wanted just one thing from you

Everything, everything, it's everything  
Everything, everything, it's everything  
Just say it to me  
Everything, everything, it's everything  
Everything, everything, it's everything  
Just say it to me  
Everything, everything, it's everything  
Everything, everything, it's everything  
I don't care if you mean it  
Everything, everything, it's everything  
Everything

We can't just slow down now  
It is not safe for driving out this town  
I wanted just one thing from you  
And mean it

So you got out of the car  
You left your bag in the backseat  
And walked inside  
And that was love
