

The Art Of Living

The Audition

I never thought that you would go this far
And I know why you went home
We tried to fix the dreams we burned to the ground
Why you left
I'll never know

You went and got yourself destroyed

You always told me what it feels like
To never have things right
What it feels like to always be alone
You said that I'm not like the rest
I said I'm in over in my head
If you don't let you in
You'll always be alone

I felt so sorry for the mess we caused
Those little lies that'd grown inside
And every time that I believed every lie
I lost a friend
A piece of mind

You went and got yourself destroyed

You always told me what it feels like
To never have things right
What it feels like to always be alone
You said that I'm not like the rest
I said I'm in over in my head
If you don't let you in
You'll always be alone

All I did was call you up
And help you get through this
Shut me down, drown me out
There's no way I can do this
I feel like running
Why did it have to come to this?

I bet you thought
It would never be easy
But I cut you off
All you have left is what you took from me
What you took from me

You went and got yourself destroyed over me
You went and got yourself destroyed

You always told me what it feels like
To never have things right
What it feels like to always be alone
You said that I'm not like the rest
I said I'm in over in my head
If you don't let you in
You'll always be alone
Always be alone
