

# The Eternal Light

The Jackson 5

Mother Earth told the people  
That the cold nights can be warm  
Just get along with your brother  
(It's the shelter from the storm)

If you're standing in the sunshine  
But still out in the rain  
Let your heart strike a match  
( 'Cause love lights the flame)

Let it shine so bright  
The eternal light  
Let it burn forever and ever  
Let love bring us together

Let it shine so bright  
The eternal light  
Let us join our hands together  
Make a chain that bonds forever

Motionless people gather dust  
Stand in the rain and you'll rust  
Let's try to show compassion

It's the time for us to learn  
There will be a better tomorrow  
Our reward is love in return

Let it shine so bright  
The eternal light  
Let it burn forever and ever  
Let love bring us together

Let it shine so bright  
The eternal light  
Let us join our hands together  
Make a chain that bonds forever
