## **Doing It to Death**

Baby, save it, we're wasted I know we gotta slow it down But when the waves come, you face them And you know we can't stop it now

Heads up we're in a dead club Put your hands up and do your dipsy and dropsy And line up, we're hanging up We're double sixing it, night after night Doing it to death Doing it to death

Baby, lately the plans we're making Are the shape of things that never come Hold your horses, the lights up Can't feel it coming back around

Listen up, it's picking up Put your hands up and do your kicksy and lipsy Your times up, we're hanging up We're double sixing it, night cause tonight We're doing it to death We're doing it to death

We're double sixing it night after night after night We're double sixing it night after night after night We're double sixing it night after night after night

Doing it to death Doing it to death Doing it to death Doing it to death The Kills
