Let me lay waste with gentle persuasion

Let me lay down to sweat in the heat

On the back of beyond we laugh at all reason

And in the light of it all there's no need to retreat

And the heat comes down And the heat comes down And hand in hand

We melt in the heat We melt in the heat We melt in the heat We melt in the heat

Save for the asking, fortune favors the brave Let me take strength from the child in your eyes And between the lines we dance into the mirror And a grateful embrace lays in wait for the sun to rise

And the heat comes down And the heat comes down And hand in hand

We melt in the heat We melt in the heat We melt in the heat We melt in the heat

Love, love, love

Please don't take it hard When I give myself to you Love will come easy When you deign to swallow my pride

Before I ever touch your lips You promise the very earth to me And tender hearts are broken down When you take me deep inside

And the heat comes down And the heat comes down And hand in hand

We melt in the heat We melt in the heat We melt in the heat We melt in the heat

We melt in the heat We melt in the heat We melt in the heat Melt in the heat
