

See The Light

The Moffatts

Your eyes are bluer than the bluest sky,
Your lips keep me comfortable when I'm with you at night,
You have the strength to move a mountain,
The victory to make dreams come true
And every night I thank God that I'm with you.

Baby, let me rock and roll with you all night, with you all night.

Baby, help me see the light, help me see the light, help me see the light,
See the light.

Every night I thank my lucky stars above, stars above
That I'm with you wherever you are.

Every move you make,
Every step that you take,
I will follow, I will follow, I will follow you.

Baby, let me rock and roll with you all night, with you all night.

Baby, help me see the light, help me see the light, help me see the light,
See the light.

Baby, let me rock and roll with you all night, with you all night.

Baby, help me see the light, help me see the light, help me see the light.

Baby, let me rock and roll with you all night, with you all night.

Baby, help me see the light, help me see the light, help me see the light,
See the light.
