

Do You Know My Name

The Union

Envy breaks your will
Technicolor pill
You're losing all insight
Anger takes its flight, yeah

I'm your burning fire
Take all you desire

I want all that you see
I'm the one to blame when you take what you need
Do you know my name?
My voice is all that you hear
I free you of guilt but I'll fill you with fear
Do you know my name?

I color you with greens
Overcome with greed, yeah

I'm your burning fire
Take all you desire

I want all that you see
I'm the one to blame when you take what you need
Do you know my name?
My voice is all that you hear
I free you of guilt but I'll fill you with fear
Do you know my name?

SOLO

I want all that you see
I'm the one to blame when you take what you need
Do you know my name?
My voice is all that you hear
I free you of guilt but I'll fill you with fear
Do you know my name?
