

That One Blue Candle

Tiffany Darwish

Turn out the light
Darkness makes me sentimental
Warm breeze wraps around us
And there's comfort in your voice

On second thought
Please leave on that one blue candle
Life reveals your secrets
And it gives my eyes a choice

All the shadows dance upon the walls
Love is all that's left to say
As the glow from that one blue candle
Softly lights the way

And tomorrow when the world returns
And the shadows of the night depart
Will the light from that one blue candle
Still be burning in our hearts?

By candle light
These moments slowly melt together
And we'll make love last forever
This time it's only us

All the shadows dance upon the walls
Love is all that's left to save
As the glow from that one blue candle
Softly lights the way

And tomorrow when the world returns
And the shadows of the night depart
Will the light from that one blue candle?
Still be burning in our hearts
Still be burning in our hearts
Still be burning in our hearts
