

Speed Of Flight

Tracy Lawrence

We said our goodbyes I watched her board the plane
As she taxied down the runway I felt a pain
That brought me to my knees
All the times before we seemed to work it out
But as I watched her plane disappear it left me with no doubt

She's gone into the night
Gone out of my life
And I'm here alone
My tears kept falling down as her plane left the ground
I watched a flame go dark
Faster than speed of flight my world fell apart

There's times that I'd swear she's right next to me
Sometimes I smell her perfume in the evening breeze
It still tears me up
They say everything in time well that remains to be seen
Then a clock clicking double time wouldn't change a thing
