

# Head Over Heels

Tyrone Wells

ABC, it's as simple as can be  
123, baby you've got me  
So I don't know my right hand from my left

Green light go, and I'm standing still  
Red light stop, I keep going 'til  
I don't know just what I should do next

Stuck up on this crazy ride  
I'm all jumbled up inside

You've got my number for real  
Now I know how it feels  
to be flipped around, head over heels  
You've got my number for real  
Like a spinning ferris wheel  
I am upside down, head over heels

You say hi, but the cat's got my tongue  
Try so hard, but the words won't come  
Somehow I just don't know what to say

"Marry me", is all that come to mind  
If I had clarity, I'd know to take more time  
But I feel like I need you now today

You've got my number for real  
Now I know how it feels  
to be flipped around, head over heels  
You've got my number for real  
Like a spinning ferris wheel  
I am upside down, head over heels

One thing that I know for sure  
Every single day  
You've got me coming back for more  
I guess all I can say
