

# Overload

Uriah Heep

Tonight you're going to  
Overload your mind  
Move into another world  
There for you online  
A high speed chase that  
Leads to the unknown  
Time will disappear so fast  
For you and you alone

A universe in isolation  
Feeding you imagination

No-one cares about  
The role you play  
Generations lost in space  
A million miles away  
Life moves faster  
Than the speed of sound  
You think you've got  
Complete control  
It makes your world go  
Round and round

Digital communication  
Feeding your imagination

Coded warning  
Now you're falling into overload  
Countdown started, no way out  
Hit the mother lode

The power that you crave  
For more and more  
You try to understand the things  
That you are fighting for  
When multi channel meltdown  
Gets to you  
You'll reach the breakpoint  
When it's over, what you gonna do

Seeing your determination  
Feeding your imagination

A universe in isolation  
Feeding you imagination  
You're looking for a new sensation  
Gotta find a real sensation

Into overload...
