

Wait For You

Wasted Penguinz

Look out in the open sky
Watch the stars passing us by
Whisper soft into the night
I wait for you

Laid down my head alone again
Impossible to tame the edge
When I'm standing at the end
I wait for you (3x)

We keep our broken memories
A face slipping away from me
If all I have is just a piece
I wait for you

When all the memories fade away
As I turn my final page
And darkness takes my breath away
I wait for you
I will wait for you
I wait for you
