

## Perfect Time

## We Shot the Moon

You found a place between the lights  
Of yesterday I could not hide  
We can make it, if we only try  
We can make it.

And there you are in perfect time  
You're standing still  
You're hands in mine  
And I love you for who you are  
And I love you, just how you are

You are, you are the only one for me  
And you are, you are the only one for me  
I tried for years to get this right  
And I'm not about to lose this fight.  
To lose this fight

The longest mile I'll walk with you  
If your sky falls I'll pull you through  
And I love you, for who you are.  
And I love you, stay who you are.

You are, you are the only one for me  
And you are, you are the only one for me  
I tried for years to get this right  
And I'm not about to lose this:

I don't have to write it down  
I know that you'll be around  
When the days are long the loves goes on  
And everything that has gone wrong  
Is brought into the light

You are, you are the only one for me  
And you are, you are the only one for me  
I tried for years to get this right  
And I'm not about to lose this fight.  
To lose this fight.
