

Jimmy

It started out with a few misfortunes
His daddy ran off with some broad from the motown
When momma said we're leavin tomorrow
Jimmy already had his things together
So many days of thinking of the past
The girl he left behind and hangin out in the
free streets
Somehow Jimmy had survived his reflections
The broken glass in his hands, a noose before him
Said he did it before
He's gonna do it again
Give him a fix and a bottle and he won't complain
Until he's blue in the face
Jimmy's the leader of a losin' race
Hey Jimmy did you learn your lesson
You always know what you were missin'
Hey Jimmy did you solve the problem
Just a kid with no direction
Some people say it was fright that drove him
But Jimmy knows who's really scared of difference
The whipping boy won't take his beating
It only left them alone to their thinking
Of how he knew what they could never know
And he would live and learn to be himself
through his mistakes
Watch and laugh, pretend they were okay
Waiting for things to change is just another day
Said he did it before
He's gonna do it again
Give him a fix or a bottle and he won't complain
Until he's blue in the face
Jimmy's the leader of a losing race
Hey Jimmy did you learn your lesson
You always knew what you were missin'
Hey Jimmy did you solve the problem
Just a kid with no direction
Hey Jimmy don't you walk away
