

Walking down the street, it's everywhere you see  
Looking right at you and staring right at me  
You can't escape it cause it's in your face  
The stars are out, they're bright today  
It's the latest craze it sets your eyes ablaze  
They're just hopin' this ain't just a passing phase  
Turn the cycle to a faster spin  
Throw the has been's out bring a fresh face in  
This is your only chance knock 'em dead  
Show it if you got it. The world is watching you  
Take it if you want it. What have you got to lose  
Raise your glass you made it  
Everyone's waiting for the next big thing,  
The next big thing  
So now you won the fight, there's no end in sight  
Everyone's your friend, might as well take a bite  
You've just made it while the others dream  
But just make sure the cash register rings  
They all know your name, it's such an easy game  
If all goes well, you'll have you're minute of fame  
Suddenly people want to help you now  
Plug it in, make sure you play it loud  
This is your only chance knock 'em dead  
Show it if you got it. The world is watching you  
Take it if you want it. What have you got to lose  
Raise your glass you made it  
Everyone's waiting for the next big thing,  
The next big thing  
Show it if you got it. The world is watching you  
Take it if you want it. What have you got to lose  
Raise your glass you made it  
Everyone's waiting for the next big thing,  
The next big thing  
Keep that spotlight on, breath it in  
Cause when it's over you will know your friends  
Yeah you enjoy yourself, appreciate the help  
You'll need all the help you can get  
Show it if you got it. The world is watching you  
Take it if you want it. What have you got to lose  
Raise your glass you made it  
Everyone's waiting for the next big thing,  
The next big thing  
Show it if you got it. The world is watching you  
Take it if you want it. What have you got to lose  
Raise your glass you made it  
Everyone's waiting for the next big thing,  
The next big thing
