

I Don't Ever Want To Come Down

13th Floor Elevators

Well some the pledge allegiance while others treasures seek
And soul wisdom spoken back each life will be unique
Some only want pleasure, you only want to please
Or bring as the highest life that prayer ever sees

I don't ever want to come down
From your village and your big town

I won't tell foreigners earth's their home
Well armed by the life you've been making
And not crush powers not your own
Just stick to your own overtaking

I don't ever want to come down
From your village and your big town

Encouraging all men (wish you would)
To live in a fable (wish you would)
I can't do no other with you (with you)
And David's Saint fable (with you)
I'm not even trying (with you)
Or curious fair (with you)
Each unicorn nation (with you)
Completely prepared

I don't ever want to come down
From your village and your big town
I don't ever want to come down
I don't ever want to come down
