

# The Error

16volt

No more faith to fade away  
No more angels, it's just a gate  
I'm just a bug  
In wence to come a never ending isolation  
Trapped inside this shadow of you  
No escape from lives diffused  
Weathered through no light remains  
You're destitute and dust again

You'll mess up anyway  
We all deserve our fame  
Our reign is underway  
The error of all will come now

We mess up everything  
We have a debt to pay  
Our reign is underway  
The error of all will come now

One more night to clear the way  
Not one more chance, it's just a break  
I'm just the evil in the gun  
That's loaded up with retribution  
All those days you had to live  
It's way too late now to forgive  
All the things you could have been  
It's just a vie to end your sin

You'll mess up anyway  
We all deserve our fame  
Our reign is underway  
The error of all will come now

We mess up everything  
We have a debt to pay  
Our reign is underway  
The error of all will come now

You are diffusing  
You are the enemy  
You mean nothing to me  
I'll erase you

You are diffusing  
You are the enemy  
You mean nothing to me  
I'll just end you

You'll mess up anyway  
We all deserve our fame  
Our reign is underway  
The error of all will come now

We mess up everything  
We have a debt to pay  
Our reign is underway  
The error of all will come now

Into nothing (4x)
