

The Other Side

1927

You were the girl
The girl that no-one ever really knew
I was the one
The one i thought you cared about
I thought it was the only love
That ever existed
Maybe i'm only dreaming about you
You never ever really cared

Telephone
The only bridge onto the isle of you
Isle of love
Too late to say i cared for you
I thought it was the only love
That ever existed
Maybe i've got it wrong about you
A never ending run around

Now i'm standing on the other side
The other side from you
Why'd you ever go and leave me all alone feeling blue

Alone on the road
The static crackles on my radio
If i could i'd sing a song of love for you
I thought it was the only love that ever existed
Maybe i'm only dreaming about you
You never ever really cared

Now i'm standing on the other side
The other side from you
Why'd you ever go and leave me all alone feeling blue

You were the girl
The girl that no-one ever really knew
I was the one
The one i thought you cared about
I thought it was the only love that ever existed
Maybe i'm only dreaming about you
A never ending run around

Now i'm standing on the other side
The other side from you
Why'd you ever go and leave me all alone feeling blue
