

Could you make it change
Can we see that far
Could we connect the dots
And make the pictures come to life for us
You could be the one
We could make a difference for the
Unbelievers, would they even care
I now have to believe
That we can make a difference
Even make things better
What else can I say

I know that we could be the ones
We could make a difference
Even make things better
Leave this place with no regrets sooo
It could, see it could be you
This could, it could be you

You could be anything for ??
Don't you waste opportunity's
Take the best ones, you better be
An you could be,
Anything that you wanna be
Don't you waste opportunity's
You let you river, LET YOUR RIVER RUN MUCH DEEPER

I know that we could be the ones
We could make a difference
Even make things better
Leave this place with no regrets soo
This could, see it could be you
Could you make it change
Can we see that far
Could we connect the dots
And make the pictures come to life for us

I know that we could be the ones
We could make a difference
Even make things better
Leave this place with no regrets soo
This could, see it could be you
