

Love Song

2PM

The day I first met you
I can't forget my trembling heart
I don't know what happened
Like a flower that blooms in the desert
Or a sweet rain at the end of a long drought
You came to me

So I need you, always be by my side
Until your scent is on my body
Until the morning sun rises

We can take our time (time)
Can't believe you're mine (mine)
Almond-scented, sweet brachetto wine (wine)
Like whipping cream on top of a small and shy strawberry
I want to embrace you

'Cause I love you
This is my love song for you, listen to my love song
This is for you and for all the things I can't express with words
This song's for you
My trust will never change, this moment will never stop
Lean on me, I love you (you) you (you) you so into you

I remember that I used to think that I'll never love again
But all of that is forgotten now and I'm born again
Like how fog disappears after the rain
Come to me

So I need you, always be by my side
Until I feel your body warmth
Until the candles go out

Your existence alone drives me crazy
So you can call me baby, I'mma put you to bed
Like Columbus, I discovered a new continent of love
I want to put in the flag like Neil Armstrong

'Cause I love you
This is my love song for you, listen to my love song
This is for you and for all the things I can't express with words
This song's for you
My trust will never change, this moment will never stop
Lean on me, I love you (you) you (you) you so into you

Stay by my side, hold my hand, kiss me
My babe my babe yeah yeah
Stay by my side, hold my hand, kiss me
My babe my babe yeah yeah

'Cause I love you
This is my love song for you, listen to my love song
This is for you and for all the things I can't express with words
This song's for you
My trust will never change, this moment will never stop
Lean on me, I love you (you) you (you) you so into you
