

Beautiful Day

3 Colours Red

Things you forget to say
Will haunt you
Down here a million days
I know you'll get me through
You don't need to stay
Because I'll never be alone
Do you cry anymore?
You're in the never-ending
Bitter and condescending blue
I just wanna be by you
And everything will turn to blue
The dream is fallacy come true
Just wanna spend some time with you
On a beautiful day...

Seeing the morning in
Forget to
Worry about the things
That hurt you
You'll becoming dependent now
Is it cold where you are too?
Freeze no more

You're in the never-ending
Bitter and condescending blue
I just wanna be by you
And everything will turn to blue
The dream is a fallacy come true
Just wanna spend some time with you
On a beautiful day...

We got it so throw it away
Cos we will be as lucky as the
Last time, child
The habits don't blow it away
We are on the other side
You know you're
Talking about the old times
Walking down an open road
But failing to disguise
Revealing the signs
Nothing you can do will change me
It's a beautiful day...
Ooooh
