

# When You're Young

3 Doors Down

So far away from knowing where I am going  
I am trying hard to find out who I am  
They all say that I don't know what I am doing  
I say they don't hardly understand

Why can't they remember  
What I'll never forget  
How these dreams can come undone  
When you're young

You give what you give cause they make you  
Trapped inside a place that won't take you  
And they want you to be what they make you  
It's already over and done  
When you're young

Everything seems perfect  
Everything's OK  
It will all get better now  
At least that's what they say  
But I don't see it coming

You give what you give cause they make you  
Trapped inside a place that won't take you  
And they want you to be what they make you  
It's already over and done  
When you're young

Days never seem longer  
They say it's better this way  
I hope one day I am stronger than I feel  
And I hope that it feels different than today

You give what you give cause they make you  
Trapped inside a place that won't take you  
And they want you to be what they make you  
(It's already over and done) [x3]  
When you're young

Why can't they remember  
What I'll never forget  
How these dreams can come undone  
When you're young
