

Vertigo

3 Feet Smaller

I can see it in your tears
You've been through a lot
Without saying a word
Oh why
What went wrong in your life
What have you done
Did you choose the wrong path
Oh why
You won't fall down with vertigo
Wast all on me
Let me taste your tragedy
While I'm dying here with you
Wast all on me
Let me taste your tragedy
While we're dying in our minds
I'm with you
I can see it in your smile
You've been in love
Where did it all go and why?
Let me show you the way out of misery
We can fly away if you stop crying
Let me take you to my heart
Let me show you all that i've been through
Now you see I know
How you feel and how's it like to go down with you
