

Vienna's Burning

3 Feet Smaller

2010, The beginning of our ruin
The human race is about to face
a new world order without any border's
Now we need security
to protect what's left of our property
Vienna is burning
The emptiness will get us all
Vendetta is turning
The emptiness will slave us forerver
Take a look at our gouvernement and you'll see
hypocrite's dressed like faggot's
Breath through the pain when you hear them scream
"We will stand your ground"
2 month's later you can't hear a sound
But what comes around goes around
Once we fall we will recall what we had
(What we had was something innocent)
Once we fall we will recall we could have escaped
(We could have escaped from here)
