I can tell exactly where the hell you been  
I think I'm from the factory that they made you in  
Lately I've been searching for replacement parts  
The well in general surgeon says he can't repair my heart  
Why won't the engine start?

Answer me why

Come on and answer me  
Why would all the world be born to die  
Somebody answer me why

I can tell exactly what the hell you've done  
Did you run away  
Cause you don't want to pay  
For the problem you've become  
All the worlds of searching  
For that greatness in our soul  
Well we're back today and what we mean to say  
Is we're taking back control  
Why won't they just let go?

Come to find we had it all the time and it chills me to the bone  
But if only we had known
