

You gotta step right in the  
Smack in the middle of it  
Just get a running start  
Don't stop before you begin  
It tears you right apart  
I'll find whatever I find  
And see whatever I see  
I'll make the rest of my mind

Hey  
For an infinite minute  
Let's stop the clock and be in it  
What takes you out just forget it  
Whatever you will allow  
For an infinite minute  
Let's find a way to begin it  
Forever and now

La la la la la let me go  
I don't need to know  
Where the slander goes  
Na na na na na you're never there  
When you're unaware

Everybody everybody gotta go  
Everybody that you know  
Everybody everybody gotta go  
It's time to jump out of the shadow  
Come together for the yesterday's already gone  
Forever forever now  
Everybody everybody gotta go  
Forever now

Taking a ride on a cosmic trip  
Getting my kicks while I try to pick apocalypse  
Find your light shine around the eclipse  
It's something I'll never miss

Hey  
For an infinite minute  
Let's stop the clock and be in it  
What takes you out just forget it  
Whatever you will allow  
For an infinite minute  
Let's find a way to begin it  
Forever and now

La la la la la let me go  
I don't need to know  
Where the slander goes  
Na na na na na you're never there  
When you're unaware

Everybody everybody gotta go  
Everybody that you know  
Everybody everybody gotta go  
It's time to jump out of the shadow

Come together for the yesterday's already gone  
Forever forever now  
Everybody everybody gotta go

Someday I know that you and I will  
We will all be gone  
But the harmony lives on and on  
On and on

Everybody everybody gotta go  
Everybody that you know  
Everybody everybody gotta go  
It's time to jump out of the shadow  
Come together for the yesterday's already gone  
Forever forever now  
Everybody everybody gotta go  
Forever now
