

Send 'em up and watch them fall  
Is anybody talking at all?

Want it all reduced down to an equation  
So many variables came up as unknown  
So I stayed up all night long writing out the code  
But by morning light I lost all my concentration, yeah

Hey yo, hey yo, is our mind even open at all?  
Hey yo, hey yo, communication is broken, hit a wall  
By the time we get out of line it's all over for composure  
Hey yo, hey yo, do you hear what I'm saying?  
Is our mind even open at all?

Has the world ever granted you anything that you wish for?  
Has your soul felt uncertain on a future outside your door?  
Let the moments come, let go and let go and let go until it's a  
ll gone  
Has the world ever granted you anything that you wish for?

Hey yo, hey yo, is our mind even open at all?  
Hey yo, hey yo, communication is broken, hit a wall  
By the time we get out of line it's all over for composure  
Hey yo, hey yo, do you hear what I'm saying?  
Is our mind even open at all?
