

Leaves go down, sometimes they hit the ground
But the cloud is still in the sky
Cause there's a better place to be and it's one you need to see
in this lifetime
So get on board and be on your way, whoa

Space to fill
Nothing to do but chill
No one minds if you misbehave

You gotta come on everyone as we set into the sun
Blending all the flavors only mixing in the perfect ones
A harmony and a beat with boom
Now let me hear it from you

Tell me what you say
You see it all so clearly
There's nowhere on Earth to be
On the open sea
Best believe me

Take your frozen heartache, lay it in the island sun
Oh bake it like a snowflake, drink the water it becomes
As it melts away

Out of bounds
Seemingly lost and found
Come around
As we sail away

You gotta come along with me as we float across the sea
Mixing all the elements with alien technology
A secret message hidden in this tune
Now let me hear it from you

Tell me what you say
Who's the one that gets you?
Free from all discretions
On the run for you
Could it be me?

Take your frozen heartache, lay it in the island sun
Oh bake it like a snowflake, drink the water it becomes
As it melts away
