

Whoa oh prisoner  
My pretty oh oh prisoner

A black ocean is the sky above  
Tiny lights bob what star you from

Trapped in material plane  
She wants to fly and they think she's insane  
But she knows what she know  
Give that girl wings and that's all she wrote

Twilight zone (2x)  
I'm floating in the dark alone and  
Is there any love out here let me know

A laser lights pinpoints the top of my dome  
Then through my body  
As if Scotty's beaming up a wayward soul  
Mutant races in an ancient universe  
Dark shadows humans rhymin' in a raggae verse

It's gone if you blink  
I can see it as soon as you think it

Dancehalls crystal balls  
On sidewalk malls  
Psychic people outdoors reading palms

I believe that you know more  
To survive the dimension if four

Oh prisoner  
My pretty oh oh prisoner

Look at the way she's searching  
Trapped in a world that's hurting  
So bad it makes her cry  
But I won't let her say good bye

Twilight zone (2x)  
I'm floating in the dark alone and (2x)  
Is there any love out here let me know  
No way (2x)
