If there's a scream inside of you Just let it go
You're beating yourself up baby
Don't you know
You've got to get through
And lift the roof off your soul

It's like the pain locked In the part of your heart It's never gonna leave it Unless you start To warm it up Be wise and be smart

Out on the ocean
There's no one around
No one to hear a sound
It's just us out here
Out on the ocean
Speaking free

Away from the city
Away from the ears that
Bug us and judge us
It's so liberating
To be free
And my heart slows down

Nice and easy
And your breathing will be pleasing
Just speak easy
And say what's on your mind
I search for something
To compare you to
Thought long and hard
For a simile true
Now I'm suddenly aware
End the quest you're beyond compare
So speak easy

If there's a shadow in your life Then there's sunshine Things turning inside out All the time Just rewind It's all in your mind

Oh so speak easy
Out here we're floating
Late in the night
And the only light to guide us is a
Full moon that's glowing
On the sea

Nice and easy
And your breathing will be pleasing
Just speak easy

And say what's on your mind
I search for something
To compare you to
Thought long and hard
For a simile true
Now I'm suddenly aware
End the quest you're beyond compare
So speak easy

Speak easy Speak easy
