

Get the fuck up

Up in the corner
Been gone for so long
It's back there in town
And rise, up out the wild town
So many secret
And trail no one

But most came in to beat them
Watch all they're entwined
What about you
What about you

And I go get you down
It's over when you come
Better hold on
Better hold on

I'll fight these wars
I'll fight these wars
It's too much more,
You and I
Foresee what lies
Foresee it hide
It's too much more, you

Hell always awaits you
Don't make it back now
Till we need your smile
Afraid I will take off
Who steps beyond this
Who lives like this

But watch all battle
As it makes your problems small
What about you
What about you

And I don't care
You tell it's over when you come
Better hold on
Better hold on

We'll fight these wars
We'll fight these wars
It's too much for,
You and I
Foresee what lies
Foresee it hide

It's too much for you
Too much for...

I am but the watcher
Don't make a secret
And drown all those

And I will get you down now
We'll make a letter
Down to Kneehigh length

But watch all battle
As it makes your problems small
What about you
What about you

And I go get you down
It's over when you come
Better hold on
Better hold on

We'll fight these wars
We'll fight these wars
It's too much for
You and I
Foresee what lies
Foresee it hide

It's too much for you
Too much for...

Yeah

That's right
