

## Still Around

3OH!3

Go ahead and burn it down  
I'm drunk and so is everyone else in this devil town  
They won't let me turn around  
To get one last look at my baby

Well, she's still around  
Well, she's still around  
Well, she's still around  
Well, she's still around

Go ahead and build it up again  
This city's just cemeteries and forgotten  
In my only hopes to see you  
And even if I never do

Well, she's still around  
Well, she's still around  
Well, she's still around  
Well, she's still around

And I know what you're thinking  
But that won't stop this drinking  
It's the least I can do

'Cuz this life is anything but certain  
When they close the final curtain  
You'll get a glimpse of the truth

'Cuz you're still around  
Well, she's still around  
Well, she's still around  
Well, she's still around

Go ahead and burn it down  
I'm drunk and so is everyone else in this devil town
