

Come Closer

4 Strings

Your eyes kept to fade me, embrace me with a smile
You never really care, just take a while
If you tried to escape me, I read your mind
I'll be calling into you

Under the blue sky
Under the blue sky

Come closer, strong enough to try
I knew always, under the blue sky
Come closer, don't you ask me why
I knew always, under the blue sky

You arm moves fast to make me, I wonder what it's like
To feel you close beside me, and hold you tight
I want you from a distance, to catch your eyes
And they occupy my mind

Under the blue sky
Under the blue sky

Come closer, strong enough to try
I Knew always, under the blue sky
Come closer, don't you ask me why
I knew always, under the blue sky

Come closer, under the blue sky
Come closer, under the blue sky
