

Into The Night

4 Strings

Shining light
another day turns into night
eternal fire
waited all my life

you take me away
million miles away from here
take me away
find a place for you and me

you're taking me higher
high as I can be
you take me away
forever you and me
take me away

you take me away

the tears I cry
kept them all inside
i needed time
to make up my mind

you take me away
million miles away from here
take me away
find a place for you and me

you're taking me higher
high as I can be
you take me away
forever you and me
take me away
