

## A Lot Like You

4HIM

We're living in this world  
But are we making a difference  
Maybe the salt in us is out of season  
They look into our eyes  
I wonder what are they seeing  
Has Jesus been disguised by our religion

And the nations cry for the real Massiah  
"O come and please show us the way"  
We say He's already come  
And that He's livin' in us  
But can He really be found in our lives today

When your words are His words  
When your way His way  
When your hands are the hands He can use  
When your heart's desire is just to be a heart  
He reaches through  
That's when Jesus looks a lot like you  
That's when Jesus looks a lot like you

If all this world's a stage  
I guess that we are the players  
So in this part we play  
What are we saying

Do we speak the truth  
With the words we're using  
If not, we're just wasting our time  
We're on a mission of hope  
With every seed that we sow  
We've got to seize every moment that passes by

All we are and all we should ever long to be  
Is just a vessel just to die  
To be fashioned by God's hand  
Until all that remains is love
