## **Shelter In the Rain**

How long have you been Waiting on a little sun to shine To take away the night Hold on for you are never alone Through the darkest skies There is a guiding light

For our God is a refuge Where the weary can run and hide in times of trouble He'll be the calm in the midst of the storm 'Till it passes by Oh, you need to know

There's a shelter in the rain There's a hope for your tomorrow There's a cover through the pain When you're underneath the weather Jesus is the shelter in the rain

Sometimes when hope is hard to find We've got to walk by faith Until we see the way Hold tight for we are promised in time Those who patiently wait Will never wait in vain

For we know God is faithful He's a fortress to run into In times of trouble He'll cover us with the wings of his love 'Till we make it through Oh, we got to know

So tell me why Why could you ever run away From the cover out into the storm Just know in time The rain's gonna bring a brighter day And the clouds will be gone But while you wait on the Lord
