

## Who's at the Wheel

4HIM

Out on this narrow road  
Eyeing every exit sign  
I wanna take control  
Running this race through my mind  
A constant struggle just to sit on the side  
My own ambition tells me I gotta drive  
But the key that turns my soul  
Tells me who's King of this road

Who keeps our life between the lines?  
Tell me who's at the wheel?  
When left is wrong who steers it right?  
Tell me who's at the wheel?

Here in this great unknown  
Traveling day and night  
These wheels are not our own  
We're just along for the ride  
Life is a journey of the choices We make  
I'll rediscover every mile of the way  
That there's only one way home  
It's riding with the King of this road

These wheels are turning faster than they ever have before  
The lights are flashing  
Warning signs that we just can't ignore  
we got the pedal to the floor

Life is a journey of the choices we make  
Now rediscover every mile of the way  
That there's only one way home  
It's riding with the King of this road
