

A Circle In The Ice

4th Dimension

Far from home I chase a dream
The child inside awakens
New perspectives lay one step ahead...

All the sudden turns in life sometimes
They blind all hope and leave you broken
Shifting winds brought union here...

The road laid before us runs for endless miles
The pull's ever-stronger, it ain't that away
Voices and cheers blend with the call of my heart
We are just what we are...

We're a circle in the ice...

Long-awaited days they fade
The past is cast into oblivion
Places, faces fill my memories...

I knew every day the dream would call
Now every night it shapes around me
A thousands hearts that beat as they were one

Like a circle in the ice...

As I stand alone, my inmost thoughts coil back home
Sanctuary of strength, I feel your embrace...

Voices and cheers drown the beat of my heart
Tonight our flame's alive...

We're a circle in the ice...
