

I'll take what you got, got, got  
I know it's not a lot, lot, lot  
Cause I just need another hit  
You're the thing that I can't quit  
You got what I want, want, want  
Here and then you're gone, gone, gone  
If you told me that we were through  
You know that I would break the truce

I want to breathe you in like your vapour  
I want to be the one you remember  
I want to feel your love like the weather  
All over me, all over me  
I want to print our hands in the pavement  
Savour your words, I won't ever waste them  
Look in your eyes and know just what you miss  
So lie to me, just lie to me

So talk, talk, talk  
Well tell me what I want, want, want  
If I don't look into your eyes  
It's almost like a perfect line  
So don't stop, stop, stop  
We'll take another shot, shot, shot  
Cause you know you got perfect aim  
I wanna feel you in my veins

I wanna breathe you in like your vapour  
I want to be the one you remember  
I want to feel your love like the weather  
All over me, all over me  
I want to print our hands in the pavement  
Savour your words, I won't ever waste them  
Look in your eyes and know just what you miss  
So lie to me, just lie to me

You sound so sweet  
When you lie to me  
Make you sound so sweet  
When you lie to me

I wanna breathe you in like your vapour  
I want to be the one you remember  
I want to feel your love like the weather  
All over me, all over me  
I want to print our hands in the pavement  
Savour your words, I won't ever waste them  
Look in your eyes and know just what you miss  
So lie to me, just lie to me

You sound so sweet  
When you lie to me  
Make you sound so sweet  
When you lie to me
