Take My Hand

I'm thinking in circles Don't know where to turn All messed up are my signals Go nothing left to burn Take my hand Take my hand Take my hand If you hold me I won't ever let you fall down If I hold you I have to face that wall not now I need you you're my witness

To all I have seen What I'm going to do with this is Set people free ("Come on now") Take my hand Take my hand Take my hand And we'll go running We'll go running We'll go running away I'm gonna run away take my hand
