

# And Then There Was Silence

69 Chambers

Facts against the world  
No one breathes a word  
The moment sags quietly  
Under the weight of dirt  
Shadows unfold  
\*\* without a soul  
Some secrets remain untold  
Nobody must know

[Chorus:]  
And then there was silence  
Passive aggressive violence  
So damn loud it's hard to bear  
But the machine keeps on rolling  
For silence to cut through the air  
And you don't care

Repeat the downfall  
Until the death bell tolls  
Breaking all brick walls  
Walls meant to stand tall  
Are there armies  
Legions somewhere out there  
Waiting to brave apathy  
Defy hypocrisy?

[Repeat chorus]

A mask for a face  
Without a future  
Keep marching in line  
Never to ask yourself when or why  
The dead ash pit of sky  
Had sucked out all life

[Repeat chorus]
